### **Strength of blast furnace coke, MICUM, IRSID**

### **Eluate analysis Fly Ash, Wood ash**

### **Fire testing of building products ISO 1716**

**For registration, please use the Industries Proficiency Test Registration Forms provided in the "Downloads" section of our Website.**

A minimum number of ten participants is required for the test objects for testing for **Strength of blast furnace coke, MICUM, IRSID, and TML for cargoes that can liquefy**. We will collect the registrations as they come in from the laboratories and will send out the samples as soon as the required minimum number of participants has been reached.

If you are planning individual international interlaboratory comparisons within your company, we will be pleased to organize and carry out such interlaboratory comparisons for you according to your wishes (test objects, parameters, methods, evaluations, assessments).

The interlaboratory tests are anonymous.

The general trading conditions of the DCC-GmbH are valid. <http://www.dcc-germany.org/en/agb-en>

With the participation the laboratory recognizes expressly the terms of transaction (DCC 03 EN.pdf) on.

You can find further information in document DCC 03 EN.pdf:
